TO DEFINE A CREATIVE LIFE IS TO BREAK BOUNDARIES

Looking back at our journey from being a publisher of comics and graphic novels to becoming one of the largest and most prolific producers of creative content in Malaysia, we realise that we have been doing one thing consistently well.

We break boundaries. We like challenging the norms, and we never look at the world as it is but for what it could be.

That is at the core of what we do. We pursue all endeavours that can change lives for the better. Lives that should be filled with inspiration, energy, joy, and discovery.

This is The Creative Life. Our Version.

CREATIVITY IS A COMMODITY THAT ALWAYS APPRECIATES

In a year, we produce over 400 publications of various genres from acclaimed local, regional, and international artists. Along with our mobile and digital offerings, interactive games, and merchandise, we offer the most diverse product lines for every age group and creative palate.

Our products all have something in common; the ability to continuously stimulate and satisfy hungry minds with inventive and attractive content.

Our products are bestsellers and our readership as well as customer base grows every year, indicating that we have our fingers firmly on the pulse of popular public demand.

CREATIVITY TRANSCENDS ALL BOUNDARIES

For all that we have achieved, we know we can do more and better. So we take everything that inspires us and translate it into art. Or clothing. Or furniture. Or a toaster!

We celebrate the Creative Life, often with like-minded partners; we bring Creativity into our hectic daily lives and allow everyone to pause a moment to enjoy it for all its beauty, imagination, and, quirkiness!

Inspiring others to let creative joy into their lives too – that's our goal!

Comics are a powerful tool to encourage children to explore knowledge beyond the curriculum. Promoting literacy, understanding, and intellectual prowess among young readers, the LEARN MORE!™ comic series appeals to the junior demographic's enthusiasm for creative and exciting visual stories that bridge the gap between popular visual entertainment and traditional storytelling.
